HUNGARIAN OAK BARRELS

INTRODUCING...

The "Barrel Builders" Hungarian Oak Barrel

A first in 38 years of producing and brokering barrels, we now have a barrel we are proud to put our name on. Hand crafted Hungarian oak that we selected on our trips to Europe, we control all levels of barrel production.

From forest selection of the finest tight grain wood to aging and toasting, the Barrel Builders Hungarian oak is a beautiful example of the finest in craftsmanship and flavors from any European cooperage. Note that this wood is from the same forests we used for our Kadar barrels in the past and the taste profiles are well established.

This is NOT your mother's Hungarian oak and this barrel will surprise the most skeptical winemaker at *a savings of several hundred dollars* over similar French barrels.
